

TECHNICAL SPECIFICATION

Dimmable

Installation scene

meet the various needs of kitchens, living rooms, bedrooms, balconies, workplaces, entertainment venues, public places, outdoor applications, soffits and other hard-to-reach spaces

Product Features

1 Multiple Wattage Options • Suitable for Different Spaces

Available in **5W / 8W / 12W** options, suitable for living rooms, bedrooms, corridors, shops, and offices, covering both accent lighting and general lighting applications.

2 High-Quality Aluminum Housing • Efficient Heat Dissipation

Made with **one-piece aluminum housing**, ensuring excellent heat dissipation to reduce lumen depreciation, extend lifespan, and provide long-term stable performance.

3 High Luminous Efficiency • Bright and Energy Saving

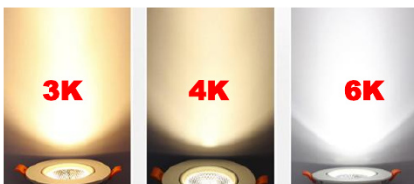

Delivers up to **100 lm/W**, providing clear and sufficient brightness while reducing energy consumption, ideal for long-hour indoor lighting use.

4 Multiple Color Temperatures & Dimmable Options

Supports **3000K / 4000K / 6500K / Tri-color options**, with dimmable versions available, allowing flexible lighting control for residential and commercial environments.

5 Standard Cut-Out Sizes • Easy Installation

Available with **55mm / 75mm / 95mm** cut-out sizes. **IP20 rated**, suitable for indoor dry locations, easy to install and highly compatible.
